Alex Morgan

Junior Python Developer

Seattle, WA | (555) 010-0142 | alex.morgan@example.com | github.com/alexmorgan-demo

PROFESSIONAL SUMMARY

Python developer with 2 years of experience building REST APIs, automating data workflows, and supporting web applications. Hands-on with Flask, Django, SQL, PostgreSQL, Docker, Git, and automated testing. Focused on readable code, reliable services, and practical collaboration across product and QA teams.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript
Frameworks: Flask, Django, FastAPI, SQLAlchemy
Data: PostgreSQL, MySQL, pandas, NumPy, REST APIs
Tools: Git, Docker, Linux, pytest, Postman, GitHub Actions
Practices: Agile, CI/CD, code review, debugging, test automation

EXPERIENCE

Python Developer | Northstar Digital, Seattle, WA

June 2024 - Present

- Developed and maintained Flask REST API endpoints used by internal operations and customer-support tools.
- Optimized PostgreSQL queries and added indexes, reducing average report response time by 32%.
- Built Python scripts to validate and import more than 8,000 customer records, cutting recurring manual work by 6 hours per week.
- Added pytest unit and integration tests for core API workflows, increasing measured test coverage from 54% to 82%.
- Collaborated with designers, QA, and product managers in two-week Agile sprints; reviewed pull requests and documented releases.

Software Development Intern | Cedar Labs, Seattle, WA

January 2024 - May 2024

- Implemented Python data-cleaning utilities with pandas and SQL to standardize weekly analytics inputs.
- Created API checks in Postman and pytest and reproduced defects from application logs.
- Containerized a development service with Docker and documented setup steps for a team of 5 engineers.

PROJECTS

Inventory Service API

Built a Flask and PostgreSQL REST API for inventory search and updates. Added input validation, SQLAlchemy models, Docker configuration, and pytest coverage for CRUD endpoints.

Job Description Keyword Assistant

Created a Python utility using pandas and scikit-learn TF-IDF to compare resume text with job descriptions and report relevant keyword gaps.

EDUCATION

B.S. in Computer Science | Evergreen State University

September 2020 - May 2024 | GPA: 3.6/4.0

Coursework: Data Structures, Database Systems, Software Engineering, Operating Systems.

CERTIFICATIONS

Python for Everybody Specialization, University of Michigan (2023) | AWS Cloud Practitioner (2024)
